

HOW'S YOUR PMO DOING?

- Is your PMO driving business transformation or impeding it?
- Is it constantly reinventing itself with new organizational structures, policies, procedures, and delivery frameworks?
- How many failed attempts at "becoming Agile" has it underwent?
- Are its projects constantly behind schedule and over budget?
- Are unpleasant conversations with business stakeholders or clients the norm?
- Are your people happy and engaged or frustrated and worn out?
- Is your ideation outpacing your capability for implementation?
- Are you still looking for that nonexistent, one-size-fits-all delivery framework?
- Are you focused on standardization instead of optimization?
- Have you had enough of project delivery mediocrity? If so:
